

## **ERIC COSTALES**

### **SUMMARY OF QUALIFICATIONS**

---

Environmental, health, and safety professional with over 20 years experience in the areas of environmental and hazardous waste site activities, including field inspections, health and safety management, industrial hygiene, regulatory and environmental compliance, hands-on construction, construction safety oversight, and heavy equipment operation.

### **PROFESSIONAL EXPERIENCE**

---

Proven expertise in conducting environmental investigations, providing remediation project oversight and sampling, and in providing site health and safety oversight and management. Responsibilities have included the management of all aspects of environmental, health and safety programs on numerous military and non-military projects, including conducting daily, weekly, and monthly safety meetings and trainings on a wide variety of health and safety topics, and performing facility and field safety audits.

Proven expertise in excavation work, including intimate knowledge of heavy equipment safety, contaminated soils evaluation and sampling/handling/disposition, underground utilities, trenching safety, and emissions of VOCs and fugitive dusts from work sites.

Proven expertise in construction hazards encountered in connection with building demolition and new building construction, including pile driving, as well as confined space entry operations into sewer systems, pump stations, utility vaults, and trenches.

Historically responsible for environmental, health and safety oversight on major excavations on various refinery modernization programs, as well as during the demolition of numerous plants and on various properties transactions. Professional activities have also included management of the segregation, sampling, and determination of the disposition for segregated soils and groundwater sampling for Union Pacific Railroad and Burlington Northern Santa Fe Railroad.

Significant experience conducting environmental investigations and remediation projects, including soil excavation oversight/third party review, groundwater sampling, bio-remediation sampling, tank replacement oversight, remedial system installation/management, soil sampling, Geoprobe sampling and monitoring well installation.
